Mr. H. P. Wienberg
United Aircraft Corporate Systems Center
1690 New Britain Ave.
Farmington, Connecticut

Dear Bud,

Thank you for your letter of September 17.
I also wish to acknowledge a previous letter from
Mr. Charles Kearns, dated September 9.

I appreciate the invitation you both have
extended to me to attend the dedication ceremony
at your new Center on October 17. You have made
the day sound most enticing, and it would have given
me a great deal of pleasure to tour your new Center
and hear Dr. Brown's remarks. Also I appreciate your
thoughtfulness in offering transportation on your
United Aircraft plane.

On the day in question (October 17), however,
I have a previous commitment to address a large group
of military intelligence officers at the Defense
Intelligence School. Please accept my sincere regrets
for being unable to accept your invitation. Maybe you
will give me a rain check for a visit on another day.

Remember me to Bob and Mr. Kearns and convey my
thanks and apologies to them.

Sincerely,

Arthur C. Lundahl

CORPORATE SYSTEMS CENTER

September 17, 1963

Mr. A. Lundahl

STAT

Dear Art:

I am sending this to your home instead of delivering it, as I explained to your secretary. Bob and I certainly hope you can join us on the 17th.

We have set up our United Aircraft airplane to leave in the morning from Page Airways, formerly Butler Aviation, for those people that find it more convenient than the air lines. The same aircraft will return to Washington by approximately 5 o'clock.

In addition to Dr. H. Brown, Ben Schriever is expected to talk as well as Mim Daddario and many of our old friends will undoubtedly be there.

Please try to use this as a good excuse to come and visit with us. I will call you again as soon as I am back in the Washington area and hopefully we can have lunch or dinner together.

Warm regards,

H.F. Wienberg

CORPORATE SYSTEMS CENTER

September 9, 1963

Mr. A. Lundahl
Central Intelligence Agency
Washington 25, D.C.

Dear Mr. Lundahl:

As you know, in 1961 the United Aircraft Corporate Systems Center was established to provide a corporate instrument for the study and management of complex systems involving the efforts of several divisions of the Corporation. During this spring we moved into a new facility here in Farmington, Connecticut and are in the final process of shaking it down.

We plan to hold a dedication ceremony on October 17 at which Dr. Harold Brown has agreed to deliver an address and we would be extremely pleased if you could be with us at that time. Our present plan calls for brief tours in the late morning to be followed by a simple luncheon and a speaking program ending before 4 o'clock.

In addition to hearing Dr. Brown's remarks, I believe that you will be keenly interested in many aspects of the work that we are doing for the Air Force as integration contractor for the 433L system and, through UTC, on the structural design and subcontract management, with the cooperation of our Sikorsky Division, of the attaching structures for the 120" solid rocket engines to the core of the Titan III space booster. We would like to show you, especially, our stellar inertial guidance system laboratory which we believe to be unique in the world and which makes possible advanced development of integrated guidance and control systems under controlled conditions.

We would be greatly honored by your presence at this important event. I do hope you can be with us.

Sincerely yours,

Charles M. Kearns
